The Challenge: Strict Requirements Often Make Business Processes Complicated

Your business must comply with an increasing number of regulations, such as:

- PCI DSS
- SOX
- HIPAA
- NERC-CIP
- GLBA
- FTC Red Flag Rules
- ISO17799/27002CA SB1386
- CJIS

Each regulation addresses a different problem and is aimed at a different audience. Most of them, however, show common traits and focus on a few main requirements:

- **Confidentiality** of sensitive information
- **Integrity and availability** of data
- **Accountability** of individuals that access or manage information
- **Ability** to show compliance

The Solution: DigitalPersona® Pro

DigitalPersona Pro helps you achieve and prove compliance. In addition, DigitalPersona Pro provides the foundation that you can leverage to address more specific needs, such as data encryption or secure remote access.

Key benefits include:

- **Ability to secure access to confidential data.** With DigitalPersona Pro, you can protect access to data in motion and at rest.

- **Integrity and availability of data.** Access recovery and centralized backup of keys help reduce the risk of data loss.

- **Accountability of individuals that access or manage information.** You can leverage DigitalPersona Pro's support for strong authentication to always know who did what, when.

- **Ability to prove compliance.** DigitalPersona Pro includes detailed event logging to help you investigate facts or provide evidence of compliance.
